

AWESOME OSINT ARSENAL

The Ultimate Open-Source Intelligence + Security Toolkit

751+ tools · 50 categories · Multi-distro installers · Georgian OSINT · Termux support

The most comprehensive OSINT and security toolkit on the internet — every tool with installation instructions or a verified link.

Buy me a coffee

⚡ Get everything in one command

```
git clone https://github.com/rawfilejson/awesome-osint-arsenal && cd awesome-osint-arsenal && sudo bash install.sh
```

🔧 Or pick just what you need

```
sudo bash osint.sh      # 🔍 OSINT only (Sherlock, Maigret, Amass, ...)  
sudo bash redteam.sh    # 🦋 Red team (Sliver, BloodHound, Mimikatz, Nuclei, ...)  
sudo bash blueteam.sh   # ❤️ Blue team (Wazuh, Sigma, Suricata, Velociraptor, ...)  
sudo bash forensics.sh  # 📁 DFIR + RE (Volatility, Ghidra, radare2, ...)  
sudo bash hardware.sh   # 🛠️ Hardware + SDR (binwalk, hackrf, openocd, ...)
```

```
sudo bash labs.sh          # 🎓 Vulnerable apps for practice (DVWA, Juice Shop, ...)  
bash termux.sh             # 📱 Android (Termux subset, no sudo needed)
```

Works on **Kali, Debian, Ubuntu, Parrot, Mint, Pop!_OS** (best — apt) Partial on **Arch / Manjaro / Fedora / RHEL** (auto-detected, falls back to git/pip/go) Termux subset on **Android**

Important

A note before you fork

This repo has **751 tools across 50 categories**. Keeping that current — links, install commands, new tools every week — is a *lot* for one person.

If nobody helps, parts of this list will go stale. That's just real talk.

How you can help in 30 seconds:

- ☆ **Star** the repo (more stars = more contributors find it)
- 🦋 **Spotted a dead link?** Open an issue, takes 1 minute
- ☕ [Buy me a coffee](#) so weekends keep going to this
- 🔊 **Share it** — tweet, Discord, wherever the security crowd hangs out

If something's broken: **don't just complain — open an issue or PR. That's how this stays useful.**

Warning

DISCLAIMER: This repository is for **educational and authorized security research only**. Always obtain written permission before testing systems you do not own. The authors are **not responsible** for any misuse of the tools or techniques listed here. See the full [Legal Disclaimer](#) at the bottom.

Installation Guide

Quick install — Kali / Debian / Ubuntu / Parrot

```
git clone https://github.com/rawfilejson/awesome-osint-arsenal
cd awesome-osint-arsenal
sudo bash install.sh
```

Pick a single stack

Script	What it installs	Use when
osint.sh	OSINT tools (Sherlock, Maigret, Amass, theHarvester, ...)	You only do recon / investigations
redteam.sh	Sliver, BloodHound, Impacket, NetExec, Mimikatz, Nuclei, ...	Authorized pentesting / red team
blueteam.sh	Wazuh, Sigma, Suricata, Velociraptor, Atomic Red Team, MITRE CALDERA	SOC / detection engineering
forensics.sh	Volatility 3, Ghidra, radare2, Plaso, CyberChef, ...	DFIR / malware analysis
hardware.sh	binwalk, hackrf, openocd, GNU Radio, gqrx, ...	RF / IoT / firmware research

Script	What it installs	Use when
<code>labs.sh</code>	DVWA, Juice Shop, WebGoat (Docker)	Local practice labs
<code>termux.sh</code>	Android-compatible subset	Phone-based recon

Other Linux distros

The installers auto-detect your package manager:

Distro	Manager	Status
Kali / Debian / Ubuntu / Parrot / Mint / Pop!_OS	apt	✓ Best — primary target
Arch / Manjaro / EndeavourOS	pacman	❑ Partial (apt-only tools skip cleanly)
Fedora / RHEL / Rocky / Alma	dnf	❑ Partial (apt-only tools skip cleanly)
Termux (Android)	pkg	✓ Subset only — use bash <code>termux.sh</code>
macOS / Windows	—	✗ Use a Kali VM or WSL2

What every installer does

- Detects your distro and uses the right package manager
- Skips what's already installed (idempotent — safe to re-run)
- Color output: ❑ installed · ❑ skipped · ● failed
- Logs failures to `~/osint-install-errors.log`
- Prints a summary at the end
- Tools cloned via git go to `/opt/osint-arsenal/` (Or `$HOME/osint-arsenal/` on Termux)

After install — add tools to your PATH

```
echo 'export PATH="$PATH:/opt/osint-arsenal"' >> ~/.bashrc
source ~/.bashrc
```

Tools installed via `apt/pip/go install` are already on your `$PATH`.

Stats at a Glance

✂ Total Tools	💻 CLI Tools	📁 GitHub Repos	🌐 Online Platforms	📦 AI Tools
751+	165+	117+	461+	25+
🕶 Dark Web	🇧🇪 Georgian OSINT	💣 Breach Engines	✂ Red Team	🛡 Blue Team
15+	500+	39+	35+	24+
🔍 Forensics	🔌 Hardware	🎓 Training	🎯 Bug Bounty	📁 Total Categories
16+	16+	21+	12+	50

1. Username & Social Media OSINT

🎯 Find accounts, profiles, and digital footprints across hundreds of platforms.

Pro tip: Start with Sherlock for a quick sweep, then use Maigret for depth — it covers 3000+ sites.

Tool	Description	Install / Link
Sherlock	Find usernames across 400+ social networks	<code>pip install sherlock-project</code>
Maigret	Advanced Sherlock fork — 3000+ sites	<code>pip install maigret</code>
Namechk	Username & domain availability checker	namechk.com
WhatsMyName	Web-based username enumeration	whatsmyname.app
Snoop	Username search (Russian-focused)	<code>pip install snoop</code>
UserRecon	Bash-based username finder	<code>git clone https://github.com/wishihab/userrecon.git</code>
Blackbird	Fast username search tool	<code>pip install blackbird-osint</code>
Social Analyzer	API-based social media profiler	<code>pip install social-analyzer</code>
NExfil	Find profiles by username	<code>pip install nexfil</code>
Socid-extractor	Extract info from web pages	<code>pip install socid-extractor</code>
Gitrecon	GitHub OSINT reconnaissance	<code>pip install gitrecon</code>
OSRFramework	Username research framework	<code>pip install osrframework</code>
Holehe	Check if email is registered on 120+ sites	<code>pip install holehe</code>

Tool	Description	Install / Link
socialscan	Check email/username availability	<code>pip install socialscan</code>
Investigo	Username checker (Go-based)	<code>go install github.com/tdh8316/investigo@latest</code>
OSINT Framework	Visual map of all OSINT tools	osintframework.com
CheckUserNames	Check username across multiple platforms	checkusernames.com
KnowEm	Username search on 500+ sites	knowem.com
Instant Username Search	Real-time username checker	instantusername.com
Usersearch.org	Free social network search	usersearch.org

🔍 Sherlock — Install & Usage

```
# Kali Linux / Ubuntu
pip install sherlock-project
sherlock "username"

# From GitHub source (always latest)
git clone https://github.com/sherlock-project/sherlock.git
cd sherlock
pip install -r requirements.txt
python3 sherlock "username"

# Search multiple usernames at once
sherlock user1 user2 user3
```

🔍 Maigret — Install & Usage

```
pip install maigret
maigret "username"

# From source
git clone https://github.com/soxoj/maigret.git
cd maigret
pip install -r requirements.txt
python3 -m maigret "username"
```

```
# Generate HTML report
maigret "username" --html
```

2. Email OSINT Tools

✉️ Verify emails, find linked accounts, check breach exposure, and analyze headers.

Pro tip: Holehe is free and fast. h8mail is best for breach correlation when API keys are configured.

Tool	Description	Install / Link
h8mail	Email OSINT & breach hunting	<code>pip install h8mail</code>
Holehe	Check email on 120+ sites	<code>pip install holehe</code>
theHarvester	Email & domain harvester	<code>pip install theHarvester</code>
EmailAnalyzer	Analyze suspicious .eml files	<code>git clone https://github.com/keraattin/EmailAnalyzer</code>
Prowl	Email & domain reconnaissance	<code>git clone https://github.com/nettitude/Prowl</code>
EmailHeader-Analyzer	CLI email header parser + OSINT	<code>git clone https://github.com/Giritharram/EmailHeader-Analyzer-CLI-Python</code>
MailHeaderDetective	Email header forensics	<code>git clone https://github.com/akajhon/MailHeaderDetective</code>
WhatMail	Email header analysis CLI	<code>git clone https://github.com/z0m31en7/WhatMail</code>

Tool	Description	Install / Link
mailto_analyzer	Email exposure analysis	<code>pip install mailto-analyzer</code>
Infoga	Email OSINT gathering	<code>git clone https://github.com/m4ll0k/Infoga</code>
Hunter.io	Find professional emails	hunter.io
Phonebook.cz	Email, domain & URL search	phonebook.cz
EmailRep	Email reputation lookup	emailrep.io
Epieos	Get info linked to email	epieos.com
GetNotify	Email open tracking + geolocation	getnotify.com
Snov.io	Email finder & verifier	snov.io
MXToolbox	Email header analysis & DNS checks	mxtoolbox.com
SimpleLogin	Email alias service for OSINT	simplelogin.io
Email-Checker	Email validation tool	email-checker.net
Voila Norbert	Find anyone's email	voilanorbert.com

h8mail — Install & Usage

```
pip install h8mail
```

```
# Basic scan
h8mail -t "target@email.com"

# With API keys (unlocks more breach sources)
# Create config.ini with your API keys from HIBP, BreachDirectory, etc.
h8mail -t "target@email.com" -k config.ini

# Scan a list of emails
h8mail -t emails.txt
```

3. Phone Number OSINT

📞 Identify carriers, locations, registrations, and linked accounts from phone numbers.

Pro tip: PhoneInfoga is the gold standard CLI tool. GetContact reveals how a number is saved by others.

Tool	Description	Install / Link
PhoneInfoga	Advanced phone number scanner	<code>pip install phoneinfoga</code>
Ignorant	Check phone registrations on sites	<code>pip install ignorant</code>
GetContact	See how number is saved by others	getcontact.com
NumVerify	Phone number validation API	numverify.com
Truecaller	Caller ID & spam lookup	truecaller.com
Sync.me	Phone number lookup	sync.me
CallerIDTest	Reverse phone lookup	calleridtest.com
SpyDialer	Free reverse phone lookup	spydialer.com
National Cellular Directory	Phone owner lookup	nationalcellulardirectory.com

Tool	Description	Install / Link
TelPoisk	Russian phone directory	telpoisk.com
NumLookup	Free reverse phone lookup	numlookup.com
Hlr-Lookups	HLR phone number lookup	hlr-lookups.com
PhoneSploit	ADB-based phone exploitation	git clone https://github.com/aerosol-can/PhoneSploit

📁 PhoneInfoga — Install & Usage

```
# Binary install (Kali Linux)
curl -sSL https://raw.githubusercontent.com/sundowndev/phoneinfoga/master/support/scripts/install | bash

# Open web UI at localhost:8080
phoneinfoga serve -p 8080

# Scan from CLI
phoneinfoga scan -n "+1234567890"

# pip install (alternative)
pip install phoneinfoga
```

4. Domain & IP OSINT

🌐 Enumerate subdomains, query DNS records, discover IP ranges, and map attack surfaces.

Pro tip: Run amass + subfinder together for maximum subdomain coverage, then pipe into httpx to check which hosts are live.

Tool	Description	Install / Link
Amass	In-depth DNS enumeration	go install github.com/owasp-amass/amass/v4/...@master

Tool	Description	Install / Link
Subfinder	Fast passive subdomain discovery	go install github.com/projectdiscovery/subfinder/v2/cmd/subfinder@latest
dnsrecon	DNS enumeration	pip install dnsrecon
Sublist3r	Subdomain enumeration	pip install sublist3r
crt.sh	Certificate transparency search	crt.sh
Shodan	Internet-connected device search	shodan.io
Censys	Internet-wide scan search	censys.io
Criminal IP	AI-powered cyber threat intelligence	criminalip.io
VirusTotal	Domain/IP/file analysis	virustotal.com
SecurityTrails	DNS & domain intelligence	securitytrails.com
IPGeoLocation	IP address geolocation	git clone https://github.com/maldevel/IPGeoLocation
Nmap	Network scanner & mapper	apt install nmap
Masscan	Fastest internet port scanner	apt install masscan

Tool	Description	Install / Link
WHOIS.com	WHOIS domain lookup	whois.com
ViewDNS	Multiple DNS tools	viewdns.info
DNSDumpster	DNS reconnaissance & mapping	dnsdumpster.com
Robtex	DNS lookup visualization	robtex.com
ARIN WHOIS	IP registration database	whois.arin.net
BGP Toolkit	BGP/ASN/IP intelligence	bgp.he.net
urlscan.io	URL/domain analysis & screenshots	urlscan.io
AbuseIPDB	IP address reputation database	abuseipdb.com
Web-Check	All-in-one website analysis	web-check.xyz
IPinfo	IP address data & geolocation	ipinfo.io
DB-IP	IP geolocation database	db-ip.com

Amass + Subfinder + HTTPx — Most effective recon combo

```
# Step 1: Enumerate subdomains passively (fast)
subfinder -d example.com -o subs.txt
```

```
# Step 2: Deep active enumeration (slower but more complete)
amass enum -d example.com -o amass_subs.txt

# Step 3: Combine and deduplicate
cat subs.txt amass_subs.txt | sort -u > all_subs.txt

# Step 4: Check which subdomains are live
cat all_subs.txt | httpx -status-code -title -o live_subs.txt

# Step 5: Screenshot all live hosts
cat live_subs.txt | eyewitness --web -d screenshots/
```

5. Geolocation & Maps OSINT

🌐 Geolocate images, analyze satellite data, and verify photo locations.

Pro tip: Combine SunCalc (shadow analysis) + ShadowMap + Mapillary for precision image geolocation.

Tool	Description	Link
Google Earth Pro	Advanced satellite imagery	earth.google.com
Overpass Turbo	OpenStreetMap data query	overpass-turbo.eu
SunCalc	Sun position/time calculator from photos	suncalc.org
GeoGuessr	Geolocation training game	geoguessr.com
Sentinel Hub	Satellite imagery access	sentinel-hub.com
FIRMS	NASA fire/thermal hotspots	firms.modaps.eosdis.nasa.gov
Wikimapia	Collaborative world map	wikimapia.org
OpenStreetMap	Free world map	openstreetmap.org
GeoSpy	AI-powered image geolocation	geospy.ai
Mapillary	Street-level imagery	mapillary.com
Maxar	Commercial satellite imagery	maxar.com
F4map	3D interactive world map	demo.f4map.com

Tool	Description	Link
Zoom Earth	Real-time satellite & weather	zoom.earth
KartaView	Street-level imagery (OpenStreetCam)	kartaview.org
ShadowMap	Shadow analysis for time estimation	shadowmap.org
Crime Brasil	Brazil crime + accidents open data by neighborhood (bairro-level RS; municipal MG/RJ; PRF accidents)	crimebrasil.com.br

6. Image & Video OSINT

🔍 Extract metadata, reverse search images, verify authenticity, and detect AI-generated content.

Pro tip: Yandex reverse image search consistently outperforms Google for finding faces and locations.

Tool	Description	Install / Link
TinEye	Reverse image search	tinEye.com
Google Reverse Image	Google image search	images.google.com
Yandex Images	Best reverse image search for faces/places	yandex.com/images
ExifTool	Image/document metadata extraction	<code>apt install libimage-exiftool-perl</code>
FOCA	Metadata extraction from documents	github.com/ElevenPaths/FOCA
InVID	Video verification toolkit	invid-project.eu
FotoForensics	Image forensic analysis (ELA)	fotoforensics.com

Tool	Description	Install / Link
Fake Image Detector	AI-based fake image detection	fakeimagedetector.com
Search by Image	Multi-engine reverse image (browser ext)	Chrome / Firefox extension
Depix	Recover pixelated text from screenshots	git clone https://github.com/beurtschipper/Depix
Forensically	Online image forensics suite	29a.ch/photo-forensics
AI or Not	Detect AI-generated images	aiornot.com
Hive Moderation	AI content detection	hivemoderation.com
Illuminarty	AI image detection	illuminarty.ai

ExifTool — Install & Usage

```
# Install
apt-get install libimage-exiftool-perl

# Basic metadata read
exiftool image.jpg

# Extract GPS coordinates specifically
exiftool -GPSLatitude -GPSLongitude image.jpg

# Strip ALL metadata (for privacy)
exiftool -all= image.jpg

# Show all metadata groups
exiftool -a -u -g1 image.jpg

# Batch process a whole folder
exiftool /path/to/images/
```

7. Facial Recognition & People Search

 Find people across the web using photos, names, or usernames.

 **Warning:** Facial recognition has serious privacy and legal implications. Use only with explicit authorization.

Tool	Description	Install / Link
FaceSeek	AI-powered reverse face search	faceseek.online
FaceCheck.ID	Face recognition search engine	facecheck.id
PimEyes	Face search engine from photos	pimeyes.com
Search4faces	Face search in VK/OK social networks	search4faces.com
face_recognition	Python face recognition library	pip install face_recognition
DeepFace	AI face analysis (age, gender, emotion)	pip install deepface
Thatsthem	Free people search	thatsthem.com
Pipl	Deep people search engine	pipl.com
BeenVerified	People search & background check	beenverified.com
Spokeo	People search aggregator	spokeo.com
FastPeopleSearch	Free people finder	fastpeoplesearch.com
WebMii	People search engine	webmii.com
OSINT Industries	People search + social media lookup	osint.industries
IDCrawl	Free people search engine	idcrawl.com

8. Social Media Monitoring

🔍 Monitor, scrape, and investigate social media accounts and communities.

Pro tip: Combine Osintgram (Instagram) + Telepathy (Telegram) + snsrape (Twitter/X) for full platform coverage.

Tool	Description	Install / Link
Osintgram	Instagram OSINT tool	git clone https://github.com/Datalux/Osintgram

Tool	Description	Install / Link
Instaloader	Instagram data downloader	<code>pip install instaloader</code>
Twint	Twitter OSINT (no API needed)	<code>pip install twint</code>
snsrape	Social media scraper (Twitter, Reddit, etc.)	<code>pip install snsrape</code>
Toutatis	Instagram OSINT by phone/email	<code>pip install toutatis</code>
TikTok Scraper	TikTok data extraction	<code>npm install -g tiktok-scraper</code>
Reddit Investigator	Reddit user analysis	reddit-user-analyser.netlify.app
socialscan	Social media presence checker	<code>pip install socialscan</code>
Telepathy	Telegram OSINT analysis	<code>pip install telepathy</code>
Twayback	Find deleted tweets	<code>pip install twayback</code>
Xquik	X/Twitter data API & MCP skill	github.com
SocialBlade	Social media analytics	socialblade.com
Social-Searcher	Free social media search engine	social-searcher.com
Mention	Social media monitoring	mention.com
BrandWatch	Social listening platform	brandwatch.com

9. Data Breach & Leak Search Engines

✳ Check if credentials, emails, or phones have been exposed in data breaches.

Pro tip: HIBP is free and safe. DeHashed and LeakCheck offer the most data for paid tiers.

Tool	Description	Type	Link
Have I Been Pwned	Check email/phone in breaches	☐ Free	haveibeenpwned.com
DeHashed	Breach search engine	💰 Paid	dehashed.com
LeakCheck	Email/username/phone breach search	☐ Freemium	leakcheck.net
Intelligence X	Search breaches, darknet, leaks	💰 Paid	intelx.io
BreachDirectory	Free breach search	☐ Free	breachdirectory.org
LeakPeek	Search leaked databases	☐ Freemium	leakpeek.com
Snusbase	Breach data search engine	💰 Paid	snusbase.com
CheckLeaked	Leak search engine (15B+ accounts)	☐ Freemium	checkleaked.cc
DataBreach.com	Data breach lookup	☐ Free	databreach.com
Hudson Rock Cavalier	Infostealer intelligence & breach data	☐ Freemium	hudsonrock.com
h8mail	Automated breach hunting CLI	☐ Free	<code>pip install h8mail</code>
XposedOrNot	Breach exposure check	☐ Free	xposedornot.com
ScatteredSecrets	Breach notification service	☐ Freemium	scatteredsecrets.com
The OSINT Rack	Ransomware & data leak monitoring	☐ Free	osintrack.com
Pwndb	Dark web breach database (Tor)	☐ Free	Requires Tor Browser
OsintCat	Email, username & phone breach lookup — fast results with real data	☐ Freemium	osintcat.net

🔒 **Pwndb — Dark Web Breach Search (requires Tor)**

```
# Start Tor service first
sudo systemctl start tor

# Clone pwndb
git clone https://github.com/coj337/pwndb.git
cd pwndb

# Install requirements
pip install -r requirements.txt

# Search by email
python3 pwndb.py --target email@example.com

# The .onion address (open in Tor Browser)
# pwndb2am33lno4bq.onion
```

10. WikiLeaks, DDoSecrets & Whistleblower Platforms

📁 Archives of leaked government, corporate, and classified documents.

Platform	Description	Link
WikiLeaks	Leaked government & corporate documents	wikileaks.org
DDoSecrets	Distributed Denial of Secrets	ddosecrets.com
Cryptome	Documents archive since 1996	cryptome.org
The Intercept	Investigative journalism	theintercept.com
SecureDrop	Whistleblower submission system	securedrop.org
ICIJ Offshore Leaks	Panama Papers, Pandora Papers	offshoreleaks.icij.org
DocumentCloud	Public document research	documentcloud.org
Wayback Machine	Web archive	web.archive.org
FBI Vault	FBI electronic reading room	vault.fbi.gov
CIA Reading Room	Declassified CIA documents	cia.gov/readingroom
NSA Declassified	NSA declassified records	nsa.gov
PACER	US federal court records	pacer.uscourts.gov

11. Password Cracking & Credential Tools

🔑 Tools for authorized password auditing and credential recovery on systems you own.

Tool	Description	Install / Link
Hashcat	Advanced password recovery (GPU-accelerated)	<code>apt install hashcat</code>
John the Ripper	Classic password cracker	<code>apt install john</code>
Hydra	Network login brute-forcer	<code>apt install hydra</code>
Medusa	Parallel brute-force tool	<code>apt install medusa</code>
CeWL	Custom wordlist generator from website	<code>apt install cewl</code>
Crunch	Pattern-based wordlist generator	<code>apt install crunch</code>
RainbowCrack	Rainbow table cracker	project-rainbowcrack.com
Ophcrack	Windows password cracker (rainbow tables)	ophcrack.sourceforge.io
LaZagne	Credentials recovery tool (post-exploit)	<code>git clone https://github.com/AlessandroZ/LaZagne</code>
Mimikatz	Windows credential dumper	<code>git clone https://github.com/gentilkiwi/mimikatz</code>
Responder	LLMNR/NBT-NS/MDNS poisoner	<code>git clone https://github.com/lgandx/Responder</code>

📖 Hashcat — Quick Reference

```
# Install
apt install hashcat

# Crack MD5 hash with wordlist
hashcat -m 0 hash.txt /usr/share/wordlists/rockyou.txt
```

```
# Crack SHA-256 with rules
hashcat -m 1400 hash.txt wordlist.txt -r rules/best64.rule

# Common hash types:
# -m 0    = MD5
# -m 100  = SHA-1
# -m 1400 = SHA-256
# -m 1800 = SHA-512crypt (Linux)
# -m 1000 = NTLM (Windows)
# -m 2500 = WPA/WPA2 (Wi-Fi)
```

12. Dark Web Search Engines & Tools

🔍 Search .onion sites, darknet markets, and hidden services.

Requires: Tor Browser or Tor service running on port 9050.

Tool	Description	Link / Onion Address
Torch	Oldest & largest dark web search engine	xmh57jrknzkxhv6y3ls3ubitzfqnrwxhopf5aygthi7d6rplyvk3noyd.onion
Haystak	Dark web search with filtering	haystak5njsmn2hqkewecpaxetahtwhsbsa64jom2k22z5afxhnpxfid.onion
Ahmia	Clearnets dark web search	ahmia.fi
DuckDuckGo Onion	Private search on Tor	duckduckgogg42xjoc72x3sjasowoarfbgcmvfimaftt6twagswzczad.onion
Phobos	Dark web search engine	phobosxilamwgcg75xt22id7aywkzo16q6rf12flipcqoc4e4ahima5id.onion

Tool	Description	Link / Onion Address
DarkSearch	Dark web search API (clearnet)	darksearch.io
OnionScan	Scan & analyze .onion sites	go install github.com/s-rah/onionscan@latest
Dark.fail	Verified dark web links directory	dark.fail
OSINT-SPY	OSINT tool with Tor support	git clone https://github.com/SharadKumar97/OSINT-SPY

🔧 Setting up Tor for dark web tools

```
# Install Tor
sudo apt install tor proxychains4

# Start Tor service
sudo systemctl start tor
sudo systemctl enable tor

# Test Tor is working
curl --socks5 127.0.0.1:9050 https://check.torproject.org/api/ip

# Use proxychains with any tool
proxychains4 nmap -sT target.onion
proxychains4 curl http://example.onion

# Edit /etc/proxychains4.conf if needed
# Make sure this line is present: socks5 127.0.0.1 9050
```

13. Anonymous & Privacy Tools

🔒 Maintain anonymity during OSINT investigations and protect your identity.

Pro tip: Use Tails OS for investigations requiring full anonymity — it leaves zero trace on disk.

Tool	Description	Install / Link
Tor Browser	Anonymous web browsing	torproject.org
Tails OS	Amnesic live OS (no trace)	tails.boum.org
Whonix	Anonymous OS via Tor (VM-based)	whonix.org
ProtonVPN	Free encrypted VPN	protonvpn.com
ProtonMail	Encrypted email	proton.me
Signal	Encrypted messaging	signal.org
OnionShare	Anonymous file sharing via Tor	onionshare.org
Anonsurf	Anonymize entire OS traffic	git clone https://github.com/Und3rf10w/kali-anonsurf
MAC Changer	Change/spoof MAC address	apt install macchanger
BleachBit	Digital footprint cleaner	bleachbit.org
VeraCrypt	Disk encryption	veracrypt.fr
KeePassXC	Offline password manager	keepassxc.org
Mullvad VPN	Privacy VPN (no email needed)	mullvad.net
Anon-SMS	Anonymous SMS sending	git clone https://github.com/HACK3RY2J/Anon-SMS.git

14. Web Application OSINT & Scanning

🕸 Fingerprint web technologies, discover hidden directories, and crawl for endpoints.

Pro tip: Run Whatweb first to fingerprint, then Nikto for quick vulns, then Nuclei for deep scanning.

Tool	Description	Install / Link
Nikto	Web server vulnerability scanner	<code>apt install nikto</code>
WPScan	WordPress vulnerability scanner	<code>gem install wpscan</code>
Wappalyzer	Technology profiler (browser ext)	Browser Extension
Whatweb	Web technology identifier	<code>apt install whatweb</code>
Dirb	Web directory brute-forcer	<code>apt install dirb</code>
Gobuster	URI/DNS brute-forcer (Go)	<code>go install github.com/OJ/gobuster/v3@latest</code>
Feroxbuster	Fast recursive content discovery	<code>apt install feroxbuster</code>
HTTPx	Fast HTTP toolkit / probing	<code>go install github.com/projectdiscovery/httpx/cmd/httpx@latest</code>
Katana	Web crawler	<code>go install github.com/projectdiscovery/katana/cmd/katana@latest</code>
LinkFinder	Discover endpoints in JavaScript	<code>git clone https://github.com/GerbenJavado/LinkFinder</code>

Tool	Description	Install / Link
Photon	Web crawler for OSINT data	git clone https://github.com/s0md3v/Photon
Wfuzz	Web fuzzer	pip install wfuzz
ParamSpider	Parameter discovery from web archives	pip install paramspider
WebHack	Web hacking toolkit	git clone https://github.com/yan4ikyt/webhack

15. Social Engineering & Phishing

🎭 Phishing simulation frameworks for authorized red team engagements.

⚠️ **For authorized penetration testing and security awareness training ONLY.**

Tool	Description	Install / Link
SET (Social Engineering Toolkit)	Complete SE framework	apt install set
Gophish	Enterprise phishing simulation platform	getgophish.com
Zphisher	30+ phishing templates	git clone https://github.com/htr-tech/zphisher
NexPhisher	Multi-platform phishing tool	git clone https://github.com/htr-tech/nexphisher
Storm-Breaker	Access webcam/mic/location (SE)	git clone https://github.com/ultrasecurity/Storm-Breaker

Tool	Description	Install / Link
Evilginx2	Man-in-the-middle reverse proxy	go install github.com/kgretzky/evilginx2@latest
Modlishka	Reverse proxy phishing framework	go install github.com/drklwi/Modlishka@latest
King Phisher	Phishing campaign toolkit	github.com/rsmusllp/king-phisher
SocialFish	Social media phishing	git clone https://github.com/UndeadSec/SocialFish
AdvPhishing	Advanced phishing tool	git clone https://github.com/Ignitetch/AdvPhishing
URLCADIZ	URL masking tool	git clone https://github.com/PerezMascato/URLCADIZ

📁 Zphisher — Install & Usage

```
git clone https://github.com/htr-tech/zphisher.git
```

```
cd zphisher
```

```
chmod +x zphisher.sh
```

```
bash zphisher.sh
```

```
# Select template from menu (Facebook, Google, Instagram, etc.)
```

```
# Tool generates a phishing URL with Cloudflare/Serveo tunnel
```

```
# Captured credentials are saved locally
```

16. Vulnerability Scanning & Exploitation

🔍 Frameworks for finding and verifying vulnerabilities on authorized targets.

⚠️ **Always have written permission before running any of these tools.**

Tool	Description	Install / Link
Metasploit	Industry-standard pen testing framework	apt install metasploit-framework
Nuclei	Template-based fast	go install github.com/projectdiscovery/nuclei/v3/cmd/nuclei@latest

Tool	Description	Install / Link
	vulnerability scanner	
SQLMap	Automated SQL injection tool	<code>apt install sqlmap</code>
Burp Suite	Web app security testing proxy	portswigger.net/burp
OWASP ZAP	Open-source web app scanner	zapproxy.org
OpenVAS	Open-source vulnerability scanner	<code>apt install openvas</code>
Commix	Command injection exploiter	<code>git clone https://github.com/commixproject/commix</code>
GoldenEye	HTTP DoS tool (authorized load testing)	<code>git clone https://github.com/jseidl/GoldenEye</code>
ExploitDB	Exploit database (searchsploit)	exploit-db.com
Criminal IP	Vulnerability & CVE search	criminalip.io

17. Network & Wireless Tools

 Analyze traffic, audit Wi-Fi networks, and perform MITM on authorized targets.

Tool	Description	Install / Link
Wireshark	Network protocol analyzer	<code>apt install wireshark</code>
Aircrack-ng	Wi-Fi security auditing suite	<code>apt install aircrack-ng</code>
Kismet	Wireless network detector & sniffer	<code>apt install kismet</code>
Bettercap	MITM framework (ARP, DNS, HTTP)	<code>apt install bettercap</code>
Ettercap	MITM attack suite	<code>apt install ettercap-common</code>
Wifite	Automated Wi-Fi auditing tool	<code>apt install wifite</code>
Reaver	WPS brute force tool	<code>apt install reaver</code>
Fern Wifi Cracker	GUI-based Wi-Fi audit tool	<code>apt install fern-wifi-cracker</code>
Fluxion	Wi-Fi social engineering (evil twin)	<code>git clone https://github.com/FluxionNetwork/fluxion</code>
hcxtools	Wi-Fi packet capture conversion	<code>apt install hcxtools</code>
Netcat	The TCP/IP swiss army knife	<code>apt install netcat-openbsd</code>
tcpdump	Command-line packet analyzer	<code>apt install tcpdump</code>

18. Mobile Hacking & Phone Exploitation

➡️ Android/iOS security testing for authorized assessments.

Tool	Description	Install / Link
PhoneSploit	ADB-based phone exploitation	<code>git clone https://github.com/aerosol-can/PhoneSploit</code>
AhMyth Android RAT	Android remote access tool	<code>git clone https://github.com/AhMyth/AhMyth-Android-RAT</code>
Apktool	Android APK decompiler/rebuilder	<code>apt install apktool</code>
jadx	Android APK decompiler (GUI)	<code>apt install jadx</code>
Frida	Dynamic instrumentation toolkit	<code>pip install frida-tools</code>
Objection	Runtime mobile exploration	<code>pip install objection</code>
MobSF	Mobile Security Framework (static+dynamic)	github.com/MobSF/Mobile-Security-Framework-MobSF
MSFPC	MSF payload creator	<code>git clone https://github.com/g0tmilk/msfpc</code>

19. AI-Powered OSINT & Free AI Tools

□ AI tools for automating research, analyzing images, and accelerating investigations.

Pro tip: Perplexity AI is excellent for OSINT research — it cites sources so you can verify everything.

AI-Powered OSINT Tools

Tool	Description	Install / Link
GeoSpy	AI geolocation from images	geospy.ai
DeepFace	Face analysis (age, gender, emotion)	<code>pip install deepface</code>

Tool	Description	Install / Link
face_recognition	Python face recognition library	pip install face_recognition
OpenCV	Computer vision library	pip install opencv-python
ReconAIzer	AI-enhanced Burp Suite extension	github.com/hisxo/ReconAIzer
AI or Not	Detect AI-generated content	aiornot.com
HARPA AI	AI browser agent for OSINT	harpa.ai

Free AI Tools for OSINT Research

Tool	Description	Free Tier	Link
Claude	Best for reasoning & analysis	✓ Free tier	claude.ai
ChatGPT	OpenAI's AI assistant	✓ GPT-4o mini	chat.openai.com
Perplexity AI	AI search with cited sources	✓ 5 Pro/day	perplexity.ai
Google Gemini	Google AI with web search	✓ Free	gemini.google.com
DeepSeek	Open-source, strong reasoning	✓ Free	chat.deepseek.com
Grok	Real-time X/Twitter data	✓ Free on X	x.com/grok
Microsoft Copilot	AI with Bing search integration	✓ Free	copilot.microsoft.com
NotebookLM	Google's document analysis AI	✓ Free	notebooklm.google.com
Phind	AI search for developers	✓ Free	phind.com
HuggingChat	Open-source AI chat	✓ Free	huggingface.co/chat

20. Financial & Corporate Intelligence

💰 Research companies, track crypto, and uncover financial relationships.

Tool	Description	Link
OpenCorporates	Global corporate database	opencorporates.com
ICIJ Offshore Leaks	Panama/Pandora/Paradise Papers	offshoreleaks.icij.org
SEC EDGAR	US company filings	sec.gov/edgar
Companies House (UK)	UK company register	beta.companieshouse.gov.uk
Aleph (OCCRP)	Global corporate & public records	aleph.occrp.org
Orbit	Bitcoin address investigator	git clone https://github.com/s0md3v/Orbit
Blockchain.com	Bitcoin explorer	blockchain.com/explorer
Etherscan	Ethereum blockchain explorer	etherscan.io
BinCheck	Bank card BIN lookup	bincheck.io
Crunchbase	Company/startup database	crunchbase.com
LEI Search	Legal Entity Identifier lookup	search.gleif.org

21. Vehicle, Property & Public Records

🚗 Access public records, vehicle history, property data, and court documents.

Tool/Service	Description	Link
FAXVIN	Free VIN decoder	faxvin.com
AutoCheck	Vehicle history reports	autocheck.com

Tool/Service	Description	Link
NICB VINCheck	Stolen vehicle check	nicb.org/vincheck
PACER	US federal court records	pacer.uscourts.gov
Zillow	Property records & estimates	zillow.com
Who Owns What	NYC landlord portfolio lookup	whoownswhat.justfix.org
FOIA.gov	Freedom of Information Act portal	foia.gov
Court Listener	Free US court opinion search	courtlistener.com

22. Metadata & Digital Forensics

 Extract hidden data, recover deleted files, and analyze digital evidence.

Pro tip: CyberChef is a must-bookmark — it handles encoding, encryption, and data manipulation all in-browser.

Tool	Description	Install / Link
Autopsy	Full digital forensics platform	autopsy.com
Volatility	Memory forensics framework	<code>pip install volatility3</code>
Wireshark	Network packet analysis	<code>apt install wireshark</code>
Binwalk	Firmware analysis & extraction	<code>apt install binwalk</code>
Foremost	File carving (recover deleted files)	<code>apt install foremost</code>
Bulk Extractor	Extract features from disk images	<code>apt install bulk-extractor</code>
ExifTool	Complete metadata extraction	<code>apt install libimage-exiftool-perl</code>
Metagoofil	Document metadata harvester	<code>pip install metagoofil</code>
CyberChef	Data analysis swiss army knife	gchq.github.io/CyberChef
Scalpel	File carving tool	<code>apt install scalpel</code>

23. IP Camera & Webcam OSINT

⚠ **WARNING:** Accessing cameras without authorization is **illegal everywhere**. This section is for educational awareness only — to understand how exposed devices are found so you can **protect them**.

Shodan Searches for Exposed Cameras

Search Query	What It Finds
screenshot.label:webcam	Webcams indexed by Shodan
port:554 has_screenshot:true	RTSP cameras with screenshots
Server: yawcam	Yawcam webcams
webcamXP	WebcamXP servers
port:8080 title:"Blue Iris"	Blue Iris CCTV
port:37777 "DVR"	Dahua DVR systems
port:80 title:"DVR"	Web-accessible DVR

Google Dorks for Camera Discovery

Google Dork	Target
inurl:"viewerframe?mode="	Axis network cameras
intitle:"webcamXP 5"	WebcamXP 5 servers
inurl:"videostream.cgi"	CGI video streams
intitle:"Live View / - AXIS"	AXIS cameras
inurl:/view/view.shtml	Mobotix cameras

24. Google Dorking Bible

🔍 Advanced search operators for finding information that isn't easily discoverable.

Pro tip: Combine multiple operators for maximum precision. Always test in a private/incognito window.

Core Operators

Operator	Description	Example
site:	Search within a domain	site:example.com admin
inurl:	Search in URL path	inurl:admin login
intitle:	Search in page title	intitle:"index of" passwords
intext:	Search in page body	intext:"username" "password"
filetype:	Search by file type	filetype:pdf "confidential"
ext:	Search by extension	ext:sql "dump"
cache:	View Google's cached version	cache:example.com
allintext:	All terms in page body	allintext:username password email

High-Value OSINT Dorks

Purpose	Google Dork
Exposed passwords	intitle:"index of" "passwords.txt"
SQL database dumps	filetype:sql "CREATE TABLE" "INSERT INTO"
Config files	ext:conf OR ext:cnf "password"
Exposed .env files	intitle:"index of" ".env"
Open FTP servers	intitle:"index of" inurl:ftp
Exposed git repos	intitle:"index of" ".git"
SSH private keys	filetype:pem "PRIVATE KEY"
phpinfo pages	ext:php intitle:phpinfo
Exposed log files	filetype:log "password" OR "username"

Dork Generator Tools

Tool	Link
DorkSearch	dorksearch.com
Google Hacking DB (GHDB)	exploit-db.com/google-hacking-database
Pagodo	git clone https://github.com/opsdisk/pagodo
GooFuzz	git clone https://github.com/m3n0sd0n41d/GooFuzz

25. Credential & Data Dorking

 Advanced dorks for finding inadvertently exposed sensitive data on the web.

Purpose	Google Dork
Gmail in spreadsheets	allintext:"@gmail.com" "password" filetype:xlsx
Exposed credentials in CSV	filetype:csv "email" "password"
Pastebin credential dumps	filetype:txt "username" "password" site:pastebin.com
Database dumps	filetype:sql "INSERT INTO" "password" "email"
Config files with API keys	filetype:env "DB_PASSWORD" OR "API_KEY" OR "SECRET"
Exposed .htpasswd	filetype:htpasswd htpasswd
phpMyAdmin without auth	inurl:phpmyadmin/index.php intitle:"phpMyAdmin"
Exposed Jenkins	intitle:"Dashboard [Jenkins]" inurl:"/login"
AWS keys exposed	filetype:pem "AKIA" OR "ASIA"
GitHub secrets	site:github.com "API_KEY" OR "api_secret" filetype:env

26. IP Tracking & Geolocation Links

🔗 Tools for tracking IP addresses through crafted links.

⚠️ **For authorized use only** — e.g., tracking your own email campaigns or authorized phishing simulations.

Tool	Description	Link
Grabify	IP grabber & URL shortener	grabify.link
IPLogger	IP logging URL shortener	iplogger.org
Canary Tokens	Tracking tokens (URL, email, DNS, files)	canarytokens.org
GetNotify	Email open tracking + geolocation	getnotify.com
IPinfo	IP address data API	ipinfo.io
IP-API	IP geolocation API	ip-api.com
MaxMind GeoIP	IP geolocation database	maxmind.com

💡 **Trick:** Mask a logger URL using the VK redirect: `https://vk.com/away.php?to=YOUR_LOGGER_URL`

27. Telegram OSINT Bots & Channels

💬 Telegram-based OSINT tools, bots, and intelligence communities.

OSINT Bots

Bot	Description	Handle
Eye of God (Glaz Boga)	Person lookup by phone/email/photo/VK	@glazzz_rus_bot
@No_BlackMail_bot	Search email by phone number	@No_BlackMail_bot
@OverSerchBot	Multi-search OSINT bot	@OverSerchBot
GetContact Bot	Phone number caller ID	@getcontact_real_bot

Bot	Description	Handle
Quick OSINT	Fast person lookup	@Quick_OSINT_bot
@CreationDateBot	Check Telegram account creation date	@creationdatebot
@SangMataBot	Check username history of TG accounts	@SangMataInfo_bot

OSINT Channels

Channel	Content	Link
@overbafer1	Hacking & cybersecurity	t.me/overbafer1
@Social_engineering	Social engineering techniques	t.me/Social_engineering
@cyberbezopasno	Cybersecurity news & tools	t.me/cyberbezopasno
@OSINT_group	OSINT community	t.me/OSINT_group

Telegram Scraping Tools

Tool	Description	Install
Telepathy	Telegram OSINT analysis	pip install telepathy
Telethon	Python Telegram API library	pip install telethon
TeleGram-OSINTer	Telegram profile investigation	git clone https://github.com/Alb-310/TeleGram-OSINTer

28. Russian OSINT & Person Lookup Services

RU Services widely used in Russian-speaking OSINT communities.

#	Service	Description	Link
1	FNS (Tax Service)	Get INN number, check tax debts	service.nalog.ru
2	TelPoisk	Phone directory — address by name	telpoisk.com
3	GetContact	See how number is saved by others	getcontact.com
4	Eye of God	Person lookup by phone/email/photo	@glazzz_rus_bot
5	Search4faces	Face search in VK & OK	search4faces.com
6	GetNotify	Email tracking + geolocation	getnotify.com
7	BinCheck	Card BIN lookup (bank, region)	bincheck.io

VK (VKontakte) OSINT

Purpose	Tool/URL
Registration data	regvk.com
FOAF data	https://vk.com/foaf.php?id=USER_ID
VK page archive	vk.watch/ID/profile
Activity tracking	nebaz.ru
VK tools	220vk.com

29. Social Media Searcher Platforms

Tool	Description	Free?	Link
Social Searcher	Real-time social media search	✓ Yes	social-searcher.com
Social Mention	Social media aggregator	✓ Yes	socialmention.com
Google Alerts	Free web monitoring	✓ Free	google.com/alerts

Tool	Description	Free?	Link
Who Posted What	Facebook keyword search	✓ Free	whopostedwhat.com
Mention	Social media & web monitoring	☐ Freemium	mention.com
Talkwalker	Social listening & analytics	💰 Paid	talkwalker.com
BrandWatch	Social intelligence platform	💰 Paid	brandwatch.com
Hootsuite	Social media management	☐ Freemium	hootsuite.com

30. Termux Hacking Toolkit (Complete)

📱 Full OSINT & security toolkit setup for Android via Termux.

Initial Setup

```
# First-time Termux setup
pkg update -y && pkg upgrade -y
pkg install python python2 git wget curl nmap
pip install requests colorama
termux-setup-storage
```

Tool List

#	Tool	Purpose	Install
1	Sherlock	Username OSINT	<code>pip install sherlock-project</code>
2	Maigret	Username OSINT (3000+ sites)	<code>pip install maigret</code>
3	h8mail	Email breach hunting	<code>pip install h8mail</code>
4	Zphisher	Phishing (30+ templates)	<code>git clone https://github.com/htr-tech/zphisher</code>

#	Tool	Purpose	Install
5	NexPhisher	Advanced phishing	git clone https://github.com/htr-tech/nexphisher
6	Storm-Breaker	Camera/Mic/Location SE	git clone https://github.com/ultrasecurity/Storm-Breaker
7	UserRecon	Username search	git clone https://github.com/wishihab/userrecon
8	IPGeoLocation	IP geolocation	git clone https://github.com/maldevel/IPGeoLocation
9	Orbit	Bitcoin address search	git clone https://github.com/s0md3v/Orbit
10	Nmap	Network scanner	pkg install nmap
11	Hydra	Login brute force	pkg install hydra
12	PhoneSploit	Phone exploitation via ADB	git clone https://github.com/aerosol-can/PhoneSploit
13	fsociety	All-in-one hacking pack	git clone https://github.com/Manisso/fsociety

📦 One-command Termux installer

```
pkg update -y && pkg upgrade -y && \
pkg install -y python git wget curl nmap hydra perl openssl php clang make openssl && \
pip install requests colorama sherlock-project maigret holehe h8mail && \
cd ~ && \
git clone https://github.com/htr-tech/zphisher && \
git clone https://github.com/Manisso/fsociety && \
git clone https://github.com/ultrasecurity/Storm-Breaker && \
git clone https://github.com/wishihab/userrecon && \
echo "Done! All tools installed."
```

31. Kali Linux OSINT Toolkit

🛠️ Tools pre-installed on Kali, plus recommended additions.

Pre-installed on Kali

Tool	Category	Command
Nmap	Network scanning	nmap
Wireshark	Packet analysis	wireshark
Metasploit	Exploitation	msfconsole
SQLMap	SQL injection	sqlmap
Hydra	Brute force	hydra
John the Ripper	Password cracking	john
Hashcat	GPU password cracking	hashcat
Aircrack-ng	Wi-Fi cracking	aircrack-ng
Nikto	Web scanner	nikto
Dirb	Directory brute force	dirb
WPScan	WordPress scanner	wpscan
theHarvester	Email/subdomain OSINT	theHarvester
Maltego	Visual link analysis	maltego
Recon-ng	Web recon framework	recon-ng
SET	Social engineering toolkit	setoolkit
Burp Suite	Web proxy	burpsuite

Quick Kali Setup (additional tools)

```
# From this repo's installer (recommended – installs everything)
sudo bash install.sh

# Or add specific tools manually:
sudo apt update && sudo apt install -y \
  amass subfinder httpx nuclei gobuster feroxbuster \
  spiderfoot eyewitness phoneinfoga metagoofil

pip install maigret holehe h8mail socialscan social-analyzer \
  deepface face_recognition volatility3 telepathy
```

32. All-in-One Hacking Frameworks

□ Comprehensive frameworks that bundle dozens of tools under one roof.

Framework	Description	Install
fsociety	Mr. Robot-inspired hacking pack	<code>git clone https://github.com/Manisso/fsociety</code>
Hackingtool	All-in-one tool (100+ categories)	<code>git clone https://github.com/Z4nzu/hackingtool</code>
SpiderFoot	OSINT automation platform	<code>pip install spiderfoot</code>
Maltego	Visual OSINT & link analysis	Pre-installed in Kali
Recon-ng	Module-based recon framework	<code>pip install recon-ng</code>
Lazy Script	Automated pentest helper	<code>git clone https://github.com/arismelachroinos/lscript</code>
osmedeus	Full automated recon workflow	<code>git clone https://github.com/j3ssie/osmedeus</code>

33. Wordlist Generation & Brute Force

□ Build custom wordlists or use proven collections.

Pro tip: CeWL is great for targeted attacks — it generates wordlists from the target's own website.

Tool	Description	Install
Crunch	Pattern-based wordlist generator	<code>apt install crunch</code>

Tool	Description	Install
CeWL	Custom wordlist from any website	<code>apt install cewl</code>
Cupp	Profile-based wordlist generator	<code>git clone https://github.com/Mebus/cupp</code>
SecLists	The ultimate security wordlist collection	<code>git clone https://github.com/danielmiessler/SecLists</code>
RockYou	Classic leaked password list	Pre-installed in Kali (<code>/usr/share/wordlists/</code>)
Weakpass	Massive wordlist collection	weakpass.com

Wordlist Quick Reference

```
# Use RockYou (already in Kali)
/usr/share/wordlists/rockyou.txt.gz
gunzip /usr/share/wordlists/rockyou.txt.gz

# Generate a pattern-based wordlist with Crunch
# Format: crunch <min> <max> <charset>
crunch 8 10 abcdefghijklmnopqrstuvwxyz0123456789 -o wordlist.txt

# Generate custom wordlist from a target website
cewl https://example.com -m 6 -w cewl_wordlist.txt

# Profile-based wordlist (interview the target)
python3 cupp.py -i
```

34. Hardware Hacking Tools

 Physical devices for authorized penetration testing and hardware security research.

Device	Description	Price
Flipper Zero	Multi-tool: RFID, NFC, IR, Sub-GHz, BadUSB	~\$170
HackRF One	Software-defined radio (1MHz–6GHz)	~\$300
Proxmark3	RFID/NFC research & cloning tool	~\$60–300
WiFi Pineapple	Wi-Fi auditing & rogue AP platform	~\$100–300

Device	Description	Price
USB Rubber Ducky	USB keystroke injection device	~\$80
Bash Bunny	Multi-function USB attack platform	~\$120
LAN Turtle	Covert network access & MITM	~\$60
RTL-SDR	Budget software-defined radio dongle	~\$25
Alfa AWUS036ACH	Long-range dual-band Wi-Fi adapter	~\$50
O.MG Cable	USB cable with embedded implant	~\$120

35. OSINT Operating Systems

 Specialized operating systems built for security research, OSINT, and privacy.

OS	Focus	Link
Kali Linux	Penetration testing (600+ tools)	kali.org
Parrot OS	Security & privacy	parrotsec.org
Tails	Privacy & anonymity (amnesic)	tails.boum.org
Whonix	Anonymous OS via Tor	whonix.org
CSI Linux	OSINT & forensics focused	csilinux.com
Trace Labs OSINT VM	OSINT-specific VM	tracelabs.org
BlackArch	2800+ security tools	blackarch.org
SIFT Workstation	SANS digital forensics	digital-forensics.sans.org
REMnux	Malware analysis	remnux.org
Qubes OS	Security via compartmentalization	qubes-os.org

OS	Focus	Link
CommandoVM	Windows pentest VM	github.com/mandiant/commando-vm

36. OSINT APIs & Developer Tools

🔗 Programmatic access to OSINT data sources for building your own tools.

API	Description	Link
Shodan API	IoT/device search	developer.shodan.io
VirusTotal API	File/URL analysis	developers.virustotal.com
Hunter.io API	Email discovery	hunter.io/api
Have I Been Pwned API	Breach check	haveibeenpwned.com/API
IPinfo API	IP geolocation	ipinfo.io/developers
Censys API	Internet scanning	search.censys.io/api
GitHub API	Repository/user data	api.github.com
Dehashed API	Breach data search	dehashed.com/docs
urlscan.io API	URL analysis	urlscan.io/docs/api
AbuseIPDB API	IP reputation	abuseipdb.com/api
Google Custom Search API	Programmable search	developers.google.com/custom-search
WhoisXML API	Domain intelligence	whoisxmlapi.com
Criminal IP API	Threat intelligence	criminalip.io/developer

37. Browser Extensions for OSINT

📦 Must-have browser extensions for every OSINT investigator.

Extension	Description	Browser
Search by Image	Multi-engine reverse image search	Chrome / Firefox
Wappalyzer	Technology stack detector	Chrome / Firefox
Shodan	Server info on any website	Chrome / Firefox
Wayback Machine	View archived pages instantly	Chrome / Firefox
EXIF Viewer	View image metadata	Chrome / Firefox
User-Agent Switcher	Change browser identity	Chrome / Firefox
FoxyProxy	Proxy management	Chrome / Firefox
Hunchly	OSINT web capture & case manager	Chrome
InVID/WeVerify	Video/image verification	Chrome / Firefox
SingleFile	Save complete web pages	Chrome / Firefox

38. OSINT Learning Resources

 The best resources for learning OSINT — from beginner to professional.

Resource	Type	Link
OSINT Framework	Interactive tool directory	osintframework.com
IntelTechniques	Michael Bazzell's resources & podcast	inteltechniques.com
Bellingcat	OSINT investigative journalism	bellingcat.com
Trace Labs	OSINT for missing persons CTFs	tracelabs.org
OSINT Curious Project	Community & training	osintcurio.us
Sector035 Week in OSINT	Weekly OSINT newsletter	sector035.nl
OSINT Dojo	Training platform & challenges	osintdojo.com
CTF Time	Hands-on CTF competitions	ctftime.org

Resource	Type	Link
GIJN	Global Investigative Journalism Network	gijn.org
SANS OSINT	Professional cyber training	sans.org

YouTube Channels

Channel	Focus
John Hammond	Cybersecurity & CTFs
The Cyber Mentor	Ethical hacking
David Bombal	Networking & security
NetworkChuck	Cybersecurity tutorials
HackerSploit	Penetration testing
Null Byte	Hacking tutorials
13Cubed	DFIR & forensics

39. Awesome OSINT GitHub Repos

★ The best curated OSINT resource lists on GitHub.

Repository	Stars	Link
jivoi/awesome-osint	20k +	github.com/jivoi/awesome-osint
danielmiessler/SecLists	55k +	github.com/danielmiessler/SecLists
Z4nzu/hackintool	40k +	github.com/Z4nzu/hackintool

Repository	Stars	Link
cipher387/osint_stuff_tool_collection	6k+	github.com/cipher387/osint_stuff_tool_collection
Manisso/fsociety	10k+	github.com/Manisso/fsociety
sinwindie/OSINT	3k+	github.com/sinwindie/OSINT
Astrosp/Awesome-OSINT-For-Everything	2k+	github.com/Astrosp/Awesome-OSINT-For-Everything
tracelabs/awesome-osint	1k+	github.com/tracelabs/awesome-osint

40. One-Click Install Scripts

Kali Linux — Full Arsenal

```
# Option 1: Direct from this repo (one command)
curl -sL https://raw.githubusercontent.com/rawfilejason/awesome-osint-arsenal/main/install.sh | sudo bash

# Option 2: Clone first (recommended – inspect before running)
git clone https://github.com/rawfilejason/awesome-osint-arsenal.git
cd awesome-osint-arsenal
sudo bash install.sh
```

Termux (Android)

```
pkg update -y && pkg upgrade -y
pkg install -y python git wget curl nmap hydra perl openssh php clang make openssl
pip install requests colorama sherlock-project maigret holehe h8mail
cd ~ && git clone https://github.com/htr-tech/zphisher && git clone
https://github.com/Manisso/fsociety
```

Manual Kali Snippet

```
sudo apt update && sudo apt upgrade -y
sudo apt install -y git python3 python3-pip golang-go nmap wireshark \
  sqlmap hydra john hashcat aircrack-ng nikto dirb wpscan \
  theharvester maltego spiderfoot set exiftool masscan whatweb \
  gobuster feroxbuster wfuzz libimage-exiftool-perl binwalk \
```

```

foremost bulk-extractor macchanger tor proxychains4

pip3 install sherlock-project maigret holehe h8mail socialscan \
social-analyzer phoneinfoga snsrape instaloader deepface \
face_recognition volatility3 blackbird-osint nexfil \
socid-extractor osrframework telepathy twayback toutatis \
dnstwist waybackpy trufflehog

```

41. Top 50 Must-Have Tools (Quick Reference)

#	Tool	Category	Install
1	Sherlock	Username OSINT	<code>pip install sherlock-project</code>
2	Maigret	Username OSINT (3000+ sites)	<code>pip install maigret</code>
3	h8mail	Email breach hunting	<code>pip install h8mail</code>
4	Holehe	Email registration check	<code>pip install holehe</code>
5	theHarvester	Domain/email recon	<code>apt install theharvester</code>
6	PhoneInfoga	Phone number OSINT	See install guide
7	Nmap	Network scanning	<code>apt install nmap</code>
8	Amass	DNS enumeration	<code>go install ...amass@master</code>
9	Subfinder	Subdomain discovery	<code>go install ...subfinder@latest</code>
10	Nuclei	Vulnerability scanning	<code>go install ...nuclei@latest</code>

#	Tool	Category	Install
11	SQLMap	SQL injection	apt install sqlmap
12	Metasploit	Exploitation framework	apt install metasploit-framework
13	Hashcat	Password cracking (GPU)	apt install hashcat
14	Hydra	Login brute force	apt install hydra
15	Wireshark	Network analysis	apt install wireshark
16	Aircrack-ng	Wi-Fi security	apt install aircrack-ng
17	Burp Suite	Web proxy/testing	portswigger.net
18	SpiderFoot	OSINT automation	pip install spiderfoot
19	Maltego	Visual link analysis	Pre-installed in Kali
20	Recon-ng	Recon framework	pip install recon-ng
21	PimEyes	Face search engine	pimeyes.com
22	Shodan	IoT device search	shodan.io
23	Censys	Internet scanning	censys.io
24	Zphisher	Phishing tool	git clone .../zphisher
25	Storm-Breaker	Camera/mic SE tool	git clone .../Storm-Breaker
26	ExifTool	Image metadata	apt install libimage-exiftool-perl
27	Autopsy	Digital forensics	autopsy.com
28	Volatility	Memory forensics	pip install volatility3
29	Tor Browser	Anonymous browsing	torproject.org
30	DeHashed	Breach search engine	dehashed.com
31	Have I Been Pwned	Breach checker	haveibeenpwned.com
32	fsociety	All-in-one framework	git clone .../fsociety
33	Hackingtool	100+ tools in one	git clone .../hackingtool

#	Tool	Category	Install
34	SecLists	Security wordlists	<code>git clone .../SecLists</code>
35	Osintgram	Instagram OSINT	<code>git clone .../Osintgram</code>
36	VirusTotal	Malware/file analysis	virustotal.com
37	Canary Tokens	IP tracking tokens	canarytokens.org
38	CyberChef	Data analysis tool	gchq.github.io/CyberChef
39	DeepFace	AI face analysis	<code>pip install deepface</code>
40	dnsrecon	DNS enumeration	<code>pip install dnsrecon</code>
41	Gobuster	Directory brute-force	<code>go install ...gobuster@latest</code>
42	HTTPx	HTTP probing	<code>go install ...httpx@latest</code>
43	EyeWitness	Web screenshots	<code>git clone .../EyeWitness</code>
44	Responder	LLMNR/NBT-NS poisoner	<code>git clone .../Responder</code>
45	Bettercap	MITM framework	<code>apt install bettercap</code>
46	Photon	Web OSINT crawler	<code>git clone .../Photon</code>
47	Perplexity AI	AI research assistant	perplexity.ai
48	GeoSpy	AI image geolocation	geospy.ai
49	osmedeus	Full recon workflow	<code>git clone .../osmedeus</code>
50	trufflehog	Git secret scanner	<code>pip install trufflehog</code>

☕ Liked everything above? Section 42-50 just dropped — fuel the next batch:

Buy me a coffee

42. ✂ Red Team & Offensive Security

C2 frameworks, AD attacks, exploitation kits, post-exploitation. Authorized testing only.

Pro tip: Sliver and Havoc are the modern open-source Cobalt Strike alternatives — start there before paying.

Tool	Description	Install / Link
AD Attack & Defense	Comprehensive Active Directory attack reference	<code>git clone https://github.com/infosecninja/AD-Attack-Defense.git</code>
Arjun	HTTP parameter discovery suite	<code>pip3 install arjun</code>
BloodHound	AD attack-path graph analysis	<code>git clone https://github.com/BloodHoundAD/BloodHound.git</code>
BloodHound CE	Community Edition of BloodHound — modernized stack	<code>docker pull specterops/bloodhound:latest</code>
<u>Brute Ratel C4</u>	Premium C2 with strong AV/EDR evasion	<u>bruteratel.com</u>
Certipy	Active Directory Certificate Services enumeration and abuse	<code>pip3 install certipy-ad</code>
<u>Cobalt Strike</u>	Premium adversary simulation /	<u>cobaltstrike.com</u>

Tool	Description	Install / Link
	red team framework	
CrackMapExec	Post-exploitation tool for AD networks	<code>pip3 install crackmapexec</code>
CRLFuzz	Fast CRLF-injection scanner in Go	<code>go install github.com/dwisiswant0/crlfuzz/cmd/crlfuzz@latest</code>
Dalfox	Fast, intelligent XSS scanner	<code>go install github.com/hahwul/dalfox/v2@latest</code>
Evil-WinRM	Ultimate WinRM shell for hacking/pentesting	<code>apt install evil-winrm</code>
Ghauri	Advanced cross-platform tool to detect/exploit SQLi	<code>git clone https://github.com/r00th3x49/ghauri.git</code>
Gxss	Test parameters for cross-site scripting reflection	<code>go install github.com/KathanP19/Gxss@latest</code>
<u>HackTricks</u>	Pentesting / hacking knowledge base by carlospolop	<u>book.hacktricks.xyz</u>
Havoc	Modern, malleable post-exploitation C2 framework	<code>git clone https://github.com/HavocFramework/Havoc.git</code>

Tool	Description	Install / Link
Impacket	Python classes for working with network protocols (Windows attacks)	<code>pip3 install impacket</code>
Kerbrute	Tool for performing Kerberos pre-auth bruteforcing	<code>go install github.com/ropnop/kerbrute@latest</code>
kiterunner	Contextual content-discovery for modern API endpoints	<code>go install github.com/assetnote/kiterunner/cmd/kr@latest</code>
Merlin	Cross-platform HTTP/2 post-exploitation server and agent in Go	<code>go install github.com/Ne0nd0g/merlin@latest</code>
Metasploit Framework	Industry-standard exploitation framework with 2000+ modules	<code>apt install metasploit-framework</code>
Mythic	Cross-platform, post-exploit, multi-user red team framework	<code>git clone https://github.com/its-a-feature/Mythic.git</code>
NetExec (nxc)	CrackMapExec maintained successor — AD network exploitation	<code>pip3 install git+https://github.com/Pennyw0rth/NetExec</code>

Tool	Description	Install / Link
<u>Nighthawk</u>	Premium evasive C2 by MDSec (Cobalt Strike alt)	<u>mdsec.co.uk</u>
NoSQLMap	Automated NoSQL database enumeration and exploitation	git clone https://github.com/codingo/NoSQLMap.git
Nuclei Templates	Community-curated templates for Nuclei	git clone https://github.com/projectdiscovery/nuclei-templates.git
ParamMiner (Burp ext)	Discover hidden, unlinked HTTP parameters in Burp	git clone https://github.com/PortSwigger/param-miner.git
PayloadsAllTheThings	Web app pentest payloads, bypasses, and methodology	git clone https://github.com/swisskyrepo/PayloadsAllTheThings.git
PetitPotam	PoC tool to coerce Windows hosts to authenticate to attacker	git clone https://github.com/topotam/PetitPotam.git
PowerShell Empire	Post-exploitation framework with PS-based agents	git clone https://github.com/BC-SECURITY/Empire.git

Tool	Description	Install / Link
Rubeus	C# toolset for raw Kerberos interaction and abuse	git clone https://github.com/GhostPack/Rubeus.git
SharpHound	C# data collector for BloodHound	git clone https://github.com/BloodHoundAD/SharpHound.git
Sliver	Open-source adversary emulation/red-team framework (Cobalt Strike alt)	go install github.com/bishopfox/sliver/server@latest
SSRFmap	Automated SSRF detection and exploitation framework	git clone https://github.com/swisskyrepo/SSRFmap.git
Villain	High-level stage 0/1 C2 framework for handling sibling agents	git clone https://github.com/t3l3machus/Villain.git
XSSStrike	Advanced XSS scanner with crawler and payload generator	git clone https://github.com/s0md3v/XSSStrike.git

43. 🛡️ Blue Team & Defensive Security

SIEM, EDR, network monitoring, detection engineering, IR.

Pro tip: Wazuh is your free Splunk replacement. Pair it with Sigma rules + Suricata for a full SOC stack on commodity hardware.

Tool	Description	Install / Link
Atomic Red Team	Library of small detection-test scripts mapped to MITRE ATT&CK	git clone https://github.com/redcanaryco/atomic-red-team.git
Chainsaw	Hunt threats in Windows event logs — fast forensics	git clone https://github.com/WithSecureLabs/chainsaw.git
Cortex (TheHive)	Observable analysis and active response engine	docker pull thehiveproject/cortex:latest
Elastic Stack (ELK)	Elasticsearch + Logstash + Kibana — log analytics	docker pull docker.elastic.co/elasticsearch/elasticsearch:latest
Falco	Cloud-native runtime security	git clone https://github.com/falcosecurity/falco.git
Graylog	Open-source log management / SIEM	docker pull graylog/graylog:latest
Hayabusa	Windows event log fast forensics timeline generator	git clone https://github.com/Yamato-Security/hayabusa.git
Loki	Simple IOC and YARA scanner by Florian Roth	git clone https://github.com/Neo23x0/Loki.git
<u>MITRE ATT&CK</u>	Adversary tactics, techniques, and procedures knowledge base	attack.mitre.org
MITRE CALDERA	Cyber adversary emulation platform	git clone https://github.com/mitre/caldera.git
<u>MITRE D3FEND</u>	Defensive countermeasure knowledge graph	d3fend.mitre.org
osquery	SQL-powered OS instrumentation/monitoring/analytics	apt install osquery
RITA	Real Intelligence Threat Analytics — beaconing/long-conn detection	git clone https://github.com/activecm/rita.git

Tool	Description	Install / Link
<u>Security Onion</u>	Linux distro for threat hunting, monitoring, and log management	securityonionsolutions.com
Sigma	Generic signature format for SIEM detections	git clone https://github.com/SigmaHQ/sigma.git
sigma-cli	Convert Sigma rules to native SIEM queries	pip3 install sigma-cli
Snort	Open-source intrusion-prevention/detection system	apt install snort
Suricata	High-perf network IDS / IPS / NSM	apt install suricata
TheHive	Scalable, free, open-source case management for SOCs	docker pull strangebee/thehive:latest
Tracee	Runtime security and forensics using eBPF (Aqua)	git clone https://github.com/aquasecurity/tracee.git
Velociraptor	Endpoint visibility and digital forensics — query-driven	git clone https://github.com/Velocidex/velociraptor.git
<u>Velociraptor Server</u>	Centralized server for Velociraptor agents	docs.velociraptor.app
Wazuh	Open-source XDR / SIEM platform	git clone https://github.com/wazuh/wazuh.git
Zeek (Bro)	Powerful network analysis framework for security monitoring	apt install zeek

44. ✳ Threat Intel Platforms

CTI platforms — open-source and enterprise.

Pro tip: MISP is free and powerful. OpenCTI gives you a STIX2-native graph DB. Both run as Docker stacks.

Tool	Description	Install / Link
<u>Anomali ThreatStream</u>	Enterprise threat intel aggregation platform	<u>anomali.com</u>
<u>CrowdStrike Falcon Intelligence</u>	Premium adversary intel from CrowdStrike	<u>crowdstrike.com</u>
<u>Digital Shadows SearchLight</u>	Brand protection + dark web monitoring (now ReliaQuest GreyMatter DRP)	<u>reliaquest.com</u>
<u>EclecticIQ Intelligence Center</u>	STIX/TAXII-native threat intel platform	<u>eclecticiq.com</u>
<u>Flashpoint</u>	Business risk intel from criminal forums and dark web	<u>flashpoint.io</u>
<u>Intel471</u>	Premium adversary intelligence and underground monitoring platform	<u>intel471.com</u>
<u>IntSights</u>	External threat protection and intel (now part of Rapid7)	<u>intsights.com</u>
<u>KELA</u>	Cybercrime intelligence and dark-web monitoring	<u>kelacyber.com</u>
<u>Mandiant Advantage</u>	Threat intel from Google's Mandiant team	<u>mandiant.com</u>
OpenCTI	Open-source CTI platform structured around STIX2	<code>docker pull opencti/platform</code>
<u>SOCRadar</u>	Extended threat intel — attack surface + dark web + brand	<u>socradar.io</u>
<u>ThreatConnect</u>	Threat intel platform combining intel and SOAR	<u>threatconnect.com</u>
<u>ThreatQ</u>	Threat intel platform for SOC's	<u>threatq.com</u>

Tool	Description	Install / Link
Yeti	Open distributed threat intelligence platform	git clone https://github.com/yeti-platform/yeti.git

45. Digital Forensics & Reverse Engineering

Disk/memory forensics, malware reverse engineering, timeline tools, binary analysis.

Pro tip: Volatility 3 + Plaso (log2timeline) + KAPE = the modern DFIR triage stack.
Ghidra > IDA Free for static analysis.

Tool	Description	Install / Link
<u>Binary Ninja</u>	Modern reverse engineering platform with API	<u>binary.ninja</u>
Cutter	GUI for radare2/rizin reverse-engineering	git clone https://github.com/rizinorg/cutter.git
Dissect	Fox-IT framework for fast forensic image analysis	pip3 install dissect
<u>Eric Zimmerman's Tools</u>	Suite of free Windows DFIR utilities	<u>ericzimmerman.github.io</u>
<u>FTK Imager</u>	Forensic disk imaging tool by AccessData	<u>exterro.com</u>
Ghidra	NSA's open-source software reverse engineering suite	git clone https://github.com/NationalSecurityAgency/ghidra.git
<u>IDA Free</u>	Free version of IDA disassembler/decompiler	<u>hex-rays.com</u>

Tool	Description	Install / Link
<u>KAPE</u>	Kroll Artifact Parser and Extractor — fast triage collection	<u>kroll.com</u>
PhotoRec	File data recovery — focuses on multimedia	<code>apt install testdisk</code>
Plaso (log2timeline)	Super-timeline creation from forensic artifacts	<code>pip3 install plaso</code>
radare2	Reverse engineering framework	<code>apt install radare2</code>
RegRipper	Open-source Windows registry parsing tool	<code>git clone https://github.com/keydet89/RegRipper3.0.git</code>
Rekall	Memory forensics tooling (legacy fork of Volatility)	<code>pip3 install rekall</code>
rizin	Modern fork of radare2 with cleaner API	<code>git clone https://github.com/rizinorg/rizin.git</code>
The Sleuth Kit	Library and CLI tools for forensic disk analysis	<code>apt install sleuthkit</code>
Volatility 3	Memory forensics framework	<code>pip3 install volatility3</code>

46. 🎓 Training, Labs & CTF

Hands-on practice — paid platforms and free local labs.

Pro tip: Free path: TryHackMe → PortSwigger Academy → HackTheBox retired boxes.
Paid path: HTB Academy + OffSec PG.

Tool	Description	Install / Link
<u>BugBountyHunter</u>	Web hacking training and labs	bugbountyhunter.com
<u>CTFtime</u>	Calendar of upcoming and past CTF events	ctftime.org
<u>Cybrary</u>	Free + paid cybersecurity courses	cybrary.it
DVWA	Damn Vulnerable Web Application — classic appsec lab	git clone https://github.com/digininja/DVWA .git
<u>Hack The Box</u>	Online pentesting labs and CTFs	hackthebox.com
<u>Hacker101</u>	Free HackerOne course library and CTF	hacker101.com
<u>Immersive Labs</u>	Cyber skills platform with hands-on exercises	immersivelabs.com
<u>Metasploitable</u>	Intentionally vulnerable Linux VM for Metasploit practice	docs.rapid7.com
<u>OffSec Proving Grounds</u>	OSCP-style training labs by Offensive Security	offsec.com
<u>OverTheWire Wargames</u>	Free wargames for learning offensive security from scratch	overthewire.org

Tool	Description	Install / Link
OWASP Juice Shop	Modern, intentionally insecure web app — covers OWASP Top 10	<code>docker pull bkimminich/juice-shop</code>
OWASP WebGoat	Deliberately insecure Java-based web app for training	<code>docker pull webgoat/webgoat</code>
PentesterLab	Hands-on web-app pentesting training	pentesterlab.com
picoCTF	Free CTF and learning platform built by CMU	picoctf.org
PortSwigger Web Security Academy	Free, world-class web security training (by Burp Suite team)	portswigger.net
pwn.college	Free college-level cybersecurity education from ASU	pwn.college
PwnedHub	Intentionally-vulnerable web app for hands-on appsec training	<code>git clone https://github.com/practisec/pwnedhub.git</code>
Root-Me	500+ challenges and 100+ virtual labs	root-me.org
TryHackMe	Beginner-friendly cybersecurity	tryhackme.com

Tool	Description	Install / Link
	training platform	
<u>VulnHub</u>	Free downloadable vulnerable VMs for offline practice	<u>vulnhub.com</u>
<u>VulnYX</u>	Online platform with vulnerable boxes (free + premium)	<u>vulnyx.com</u>

47. 🎯 Bug Bounty Platforms

Where to actually earn money from your skills.

Pro tip: Start on Bugcrowd or YesWeHack public programs — easier triage and lower competition than HackerOne H1.

Tool	Description	Install / Link
<u>Bugbase</u>	Indian-origin bug-bounty + vulnerability disclosure platform	<u>bugbase.ai</u>
<u>Bugcrowd</u>	Crowdsourced security platform — bug bounty + pentesting	<u>bugcrowd.com</u>
<u>Disclose.io</u>	Standardized vulnerability-disclosure language and tools	<u>disclose.io</u>
<u>HackerOne</u>	Largest bug-bounty platform — public and private programs	<u>hackerone.com</u>
<u>HackTrophy</u>	European bug-bounty platform	<u>hacktrophy.com</u>
<u>Immunefi</u>	Web3 / crypto-focused bug bounty platform	<u>immunefi.com</u>

Tool	Description	Install / Link
<u>Intigriti</u>	European bug-bounty platform with fast triage	<u>intigriti.com</u>
<u>Open Bug Bounty</u>	Free coordinated-disclosure platform	<u>openbugbounty.org</u>
<u>Public Bug Bounty Programs (chaos)</u>	ProjectDiscovery's free BBH program list	<u>chaos.projectdiscovery.io</u>
<u>Synack</u>	Crowdsourced + vetted-researcher pentesting platform	<u>synack.com</u>
<u>YesWeHack</u>	European-based bug-bounty and VDP platform	<u>yeswehack.com</u>
<u>Zerodium</u>	Premium 0day acquisition platform	<u>zerodium.com</u>

48. 📖 Learning Resources

Books, courses, blogs, YouTube channels, awesome lists.

Pro tip: IppSec.rocks indexes EVERY HackTheBox walkthrough — search any retired box and watch how a pro solves it.

Tool	Description	Install / Link
<u>0xdf hacks stuff</u>	HTB writeups and pentesting writeups	<u>0xdf.gitlab.io</u>
<u>awesome-hacking-resources</u>	Beginner-friendly hacking learning resources	<u>github.com</u>
<u>awesome-incident-response</u>	Curated list of IR tools and resources	<u>github.com</u>
<u>awesome-malware-analysis</u>	Curated list of malware-analysis tools	<u>github.com</u>

Tool	Description	Install / Link
<u>awesome-pentest</u>	Massive curated list of pentesting tools and resources	<u>github.com</u>
<u>Bellingcat's Online Investigations Toolkit</u>	Bellingcat-curated tools and methodology guide	<u>bellingcat.com</u>
<u>BTFM: Blue Team Field Manual</u>	Concise blue-team incident response reference	<u>amazon.com</u>
<u>Hacking: The Art of Exploitation (book)</u>	Classic by Jon Erickson — low-level attack fundamentals	<u>nostarch.com</u>
<u>IppSec.rocks</u>	Indexed walkthroughs of HackTheBox machines (video)	<u>ippsec.rocks</u>
<u>John Hammond</u>	Cybersecurity YouTube — CTFs, malware, walkthroughs	<u>youtube.com</u>
Linux for OSINT (cipher387)	21-day Linux-for-OSINT course (free)	git clone https://github.com/cipher387/linux-for-OSINT-21-days.git
<u>LiveOverflow</u>	Hacking and security YouTube — deep technical content	<u>youtube.com</u>
<u>NahamSec</u>	Bug bounty and offensive security YouTube content	<u>youtube.com</u>
<u>Netlas Cookbook</u>	Free OSINT automation cookbook	<u>academy.netlas.io</u>

Tool	Description	Install / Link
<u>OSINT Curious</u>	Community blog, podcast, and learning resources	<u>osintcurio.us</u>
<u>OSINT Techniques</u>	Michael Bazzell's resources, books, and search tools	<u>inteltechniques.com</u>
Python for OSINT (cipher387)	21-day Python-for-OSINT course (free)	git clone https://github.com/cipher387/python-for-OSINT-21-days.git
<u>Real-World Bug Hunting (book)</u>	Peter Yaworski — bug bounty methodology and real reports	<u>nostarch.com</u>
<u>RTFM: Red Team Field Manual</u>	Concise red-team command reference	<u>amazon.com</u>
<u>The Web Application Hacker's Handbook (book)</u>	Stuttard & Pinto — appsec bible	<u>amazon.com</u>

49. ✨ Extra Tools (curated additions)

Tools added in v2.x — modern recon, archive lookups, niche services, research-grade pivots.

Pro tip: This section gets refreshed every release — check before you reach for an older tool.

Tool	Description	Install / Link
<u>abuse.ch Hunting</u>	Hunt across all abuse.ch malware platforms with one query	<u>hunting.abuse.ch</u>

Tool	Description	Install / Link
<u>Aleph Open Search</u>	Dark-web search engine by Aleph Networks	open-search.aleph-networks.eu
<u>Aletheia (image forensics)</u>	Detect manipulated/AI-generated images	aletheia.ai
altdns	Generates permutations, alterations and mutations of subdomains	<code>pip3 install py-altdns</code>
anew	Append lines from stdin to a file only if not already there	<code>go install github.com/tomnomnom/anew@latest</code>
<u>ANY.RUN</u>	Interactive online malware sandbox	any.run
<u>Apollo.io</u>	B2B phone/email finder — 1200 free credits/yr	apollo.io
<u>APT Groups and Operations</u>	Spreadsheet of threat actors, sponsoring countries, TTPs	docs.google.com
Aquatone	Visual inspection of websites across hosts (HTTP screenshots, attack-surface flyovers)	<code>go install github.com/michenriksen/aquatone@latest</code>
<u>Archive.today</u>	Web archive — saves snapshots even when robots.txt blocks Wayback	archive.ph
Arctic Shift	Tool for accessing large dumps of Reddit data via API/web	<code>git clone https://github.com/ArthurHeitmann/arctic_shift.git</code>

Tool	Description	Install / Link
<u>Arkham Intelligence</u>	On-chain intel — labels, entities, historical flows	<u>arkhamintelligence.com</u>
assetfinder	Find domains and subdomains related to a given domain	go install github.com/tomnomnom/assetfinder@latest
AutoRecon	Multi-threaded network reconnaissance and enumeration framework	pip3 install git+https://github.com/Tib3rius/AutoRecon.git
Axiom	Dynamic infra framework for parallel cloud-based recon	git clone https://github.com/pry0cc/axiom.git
<u>BackgroundChecks.com</u>	Background check aggregator (BeenVerified family)	<u>backgroundchecks.com</u>
<u>Baidu</u>	Major Chinese search engine — essential for China-focused OSINT	<u>baidu.com</u>
<u>BeVigil</u>	Search subdomains, URLs, parameters from mobile applications	<u>bevigil.com</u>
<u>BGP.tools</u>	Modern BGP toolkit for network reconnaissance	<u>bgp.tools</u>
<u>BinaryEdge</u>	Cyber risk and attack-surface intelligence	<u>binaryedge.io</u>
<u>Bitquery</u>	Blockchain data APIs for on-chain investigation	<u>bitquery.io</u>

Tool	Description	Install / Link
<u>Black Book Online</u>	Free nationwide directory of public-record lookups	<u>blackbookonline.info</u>
BlackEye	32+ phishing template builder for credential capture (lab-only)	git clone <u>https://github.com/An0nUD4Y/blackeye.git</u>
<u>Brave Browser</u>	Privacy-focused browser with built-in Tor/IPFS support	<u>brave.com</u>
<u>Brave Search</u>	Independent, transparent, ad-free search engine	<u>search.brave.com</u>
<u>BreachForums Status</u>	Status tracking for the rotating BreachForums mirrors	<u>breachforums.cx</u>
<u>Breadcrumbs</u>	Free crypto investigation platform — visualize transaction flows	<u>breadcrumbs.app</u>
<u>BrightCloud Threat Intelligence</u>	URL/IP/threat reputation database	<u>brightcloud.com</u>
<u>BrightCloud URL/IP Lookup</u>	Reputation, category, and threat checks for URLs/IPs	<u>brightcloud.com</u>
<u>BscScan</u>	Binance Smart Chain explorer — same UX as Etherscan	<u>bscscan.com</u>
<u>CachedView</u>	View Google/Bing/Yandex cached versions of any page	<u>cachedview.com</u>

Tool	Description	Install / Link
<u>Castrick</u>	Find social media accounts via email, username, phone	<u>castrickclues.com</u>
Censys CLI	Official Python wrapper and CLI for Censys	<code>pip3 install censys</code>
<u>CertKit Certificate Search</u>	Fast search for public SSL/TLS certificate records	<u>certkit.io</u>
<u>Chainabuse</u>	Public crypto-scam reporting database	<u>chainabuse.com</u>
<u>Chainalysis Reactor</u>	Premium blockchain investigation platform	<u>chainalysis.com</u>
<u>CheckUser</u>	Search username across multiple social networks	<u>checkuser.vercel.app</u>
<u>CIRCL Hashlookup</u>	Free public hashlookup for known software files	<u>circl.lu</u>
<u>Cisco Talos Intelligence</u>	IP and Domain Reputation Center for real-time detection	<u>talosintelligence.com</u>
<u>Clearbit Connect</u>	Email finder browser extension with company data	<u>connect.clearbit.com</u>
<u>Cloudflare Radar</u>	Internet traffic patterns, attacks, technology trends	<u>radar.cloudflare.com</u>
<u>Clustrmaps</u>	Find people and address information	<u>clustrmaps.com</u>
<u>Commander Search</u>	Boolean search builder for OSINT investigators	<u>commandersearch.com</u>

Tool	Description	Install / Link
<u>Constella Intelligence</u>	Identity threat intel from breaches and dark web	<u>constellaintelligence.com</u>
<u>ContactOut</u>	Find emails and phones for 300M+ professionals	<u>contactout.com</u>
<u>CredenShow</u>	Identify your compromised credentials before others do	<u>credenshow.com</u>
CrossLinked	LinkedIn enumeration — generate username lists from LinkedIn profiles	<code>pip3 install crosslinked</code>
<u>DBpedia</u>	Structured Wikipedia data — SPARQL endpoint	<u>dbpedia.org</u>
<u>Digital Footprint Check</u>	Free username check on hundreds of sites	<u>digitalfootprintcheck.com</u>
dirsearch	Web path scanner — advanced wordlist-based directory bruteforce	<code>pip3 install dirsearch</code>
<u>Discord Lookup</u>	Look up Discord user info via ID	<u>discordlookup.com</u>
<u>DiscordHistory</u>	Search public Discord servers and messages	<u>disboard.org</u>
<u>DNS History</u>	Historical DNS records lookup	<u>dnshistory.org</u>
<u>DocumentCloud</u>	Platform for analyzing, annotating, publishing documents	<u>documentcloud.org</u>

Tool	Description	Install / Link
<u>DomainEye Reverse WHOIS</u>	Search domains by registrant data	<u>domaineye.com</u>
dork-cli	Run Google dorks from the command line	<code>git clone https://github.com/jgor/dork-cli.git</code>
<u>DorkGenius</u>	AI-powered search query generator for Google, Bing, DuckDuckGo	<u>dorkgenius.com</u>
<u>Dorky</u>	Online dork builder for Google/Bing/DuckDuckGo	<u>dorky.io</u>
<u>Dune Analytics</u>	SQL queries over indexed blockchain data	<u>dune.com</u>
<u>Elliptic</u>	Crypto financial-crime detection and investigation	<u>elliptic.co</u>
<u>EmailRep.io</u>	Free email reputation API by Sublime Security	<u>emailrep.io</u>
<u>Epieos Tools</u>	Reverse-lookup email/phone for Google profile data	<u>tools.epieos.com</u>
<u>Epstein Exposed</u>	Searchable database of 2M+ DOJ Epstein case docs and network graphs	<u>epsteinexposed.com</u>
<u>ETDA APT Groups</u>	Search threat-actor groups and their tools	<u>apt.etda.or.th</u>
etherscan-py	Python wrapper for Etherscan API	<code>pip3 install etherscan-python</code>

Tool	Description	Install / Link
<u>ExportData</u>	Historical tweet, follower, and trend export tool	<u>exportdata.io</u>
<u>FamilyTreeNow</u>	Free genealogy search — addresses, phones, emails	<u>familytreenow.com</u>
ffuf	Fast Go-based web fuzzer — directory, parameter, vhost discovery	go install github.com/ffuf/ffuf/v2@latest
<u>Filesec.io</u>	Catalog of malicious file extensions, risks, OS-level mitigations	<u>filesec.io</u>
Findomain	Cross-platform subdomain enumerator with monitoring features	git clone https://github.com/Findomain/Findomain. git
<u>Flickr</u>	Photo-sharing — geosearch + license + camera EXIF intact	<u>flickr.com</u>
<u>Foller.me</u>	Twitter analytics — bio, languages, hashtags, mentions	<u>foller.me</u>
<u>Forensically Beta</u>	Online image forensics — clone detection, level sweep	<u>29a.ch</u>
<u>FullContact</u>	Identity-resolution API and person enrichment	<u>fullcontact.com</u>
gau (getallurls)	Fetch URLs from AlienVault OTX, Wayback, Common Crawl, URLScan	go install github.com/lc/gau/v2/cmd/gau@latest

Tool	Description	Install / Link
<u>Geocreepy</u>	Geolocation aggregator — pulls geotagged posts across networks	<u>geocreepy.com</u>
<u>GeoHints</u>	Browser-based satellite/streetview geolocation training & investigation	<u>geohints.com</u>
<u>GeoSpy Pro</u>	Premium AI image geolocation by Graylark	<u>geospy.ai</u>
<u>Get-Metadata.com</u>	Online EXIF extractor — handles .DOCX/.PDF too	<u>get-metadata.com</u>
gf	Wrapper around grep with patterns for bug-bounty workflow	go install <u>github.com/tomnomnom/gf@latest</u>
<u>Ghiro</u>	Automated digital image forensics	<u>getghiro.org</u>
git-hound	Find sensitive data exposed via GitHub code search	go install <u>github.com/tillson/git-hound@latest</u>
github_monitor	Real-time tracking of GitHub user activity and repo changes	git clone <u>https://github.com/misiektcja/github_monitor.git</u>
gitleaks	Detect secrets, credentials, and API keys in git repos	go install <u>github.com/gitleaks/gitleaks/v8@latest</u>
<u>Google Guide Advanced Operators</u>	Reference for Google search operators	<u>googleguide.com</u>
<u>Google Hacking Database (GHDB)</u>	Index of dorks for finding publicly exposed info	<u>exploit-db.com</u>

Tool	Description	Install / Link
GoSpider	Fast Go web spider for crawling/audit	go install github.com/jaeles-project/gospider@latest
gowitness	Modern Go-based web screenshot utility (Aquatone successor)	go install github.com/sensepost/gowitness@latest
<u>GrayhatWarfare</u>	Index of open Amazon S3 buckets — find exposed cloud data	<u>grayhatwarfare.com</u>
GreyNoise CLI	Command-line tool for GreyNoise mass-scanner intel	pip3 install greynoise
<u>GreyNoise Visualizer</u>	Tells you which IPs are noise vs targeted threats	<u>viz.greynoise.io</u>
hakrawler	Fast Go web crawler for endpoint and asset discovery	go install github.com/hakluke/hakrawler@latest
<u>Hatching Triage</u>	Modern malware sandbox with kernel-level monitoring	<u>tria.ge</u>
<u>haveibeenzuckered</u>	Check if a phone number is in the 533M Facebook breach	<u>haveibeenzuckered.com</u>
<u>HIB Ransomed</u>	Check if your data has been leaked by ransomware groups	<u>haveibeenransom.com</u>
httprobe	Take a list of domains and probe for working HTTP/HTTPS	go install github.com/tomnomnom/httprobe@latest
<u>Hudson Rock</u>	Free infostealer-compromise check	<u>hudsonrock.com</u>

Tool	Description	Install / Link
	tools (domain/email/IP)	
<u>Hybrid Analysis</u>	Free advanced malware analysis service by CrowdStrike	<u>hybrid-analysis.com</u>
<u>IKnowYour.Dad</u>	Data breach search engine	<u>iknowyour.dad</u>
<u>Imgur</u>	Image hosting — meme tracing and reverse search	<u>imgur.com</u>
instagram_monitor	Real-time tracking of Instagram users with email alerts and CSV logs	git clone <u>https://github.com/misiektaja/instagram_monitor</u> .git
